

AI Will Disrupt Every Aspect of Data Management

Success with AI is determined by what goes into it. Data.
Bad data is a big problem for AI.

Inaccurate. Bad quality. Siloed. Out of context. Not trusted.

Data management tools aren't designed for AI use cases.
They don't promote and manage data utilization. They ignore unstructured data. They don't provide context.

Currently, CDAOs are weighed down by legacy data management tools that are costly to maintain and even more costly to modernize. Data tools are siloed. Data is siloed.

Unfortunately, bad data results in underwhelming AI.

Data-Centric AI Solutions

Q Spark combines expertise in data management and AI to deliver impactful AI solutions.

We specialize in delivering combined AI & Data Management solutions.

Tailored AI co-pilot apps

Pre-built AI Model Accelerators

Data Modernization

Data Mesh / Data Fabric

Data Governance for AI

Structured + Unstructured Data

Sparking Innovation with AI & Data

Q Spark Group is a unique consulting company. We're new - founded in the era of AI. We believe AI will disrupt everything about your business. That includes your data management strategy & architecture.
